

Anticoagulation Therapy

ACROSS

- 1. Two words. What heparin doses should be based on in addition to clotting studies
- 6. Symbol for venous pressure monitor
- 11. A physician licensed to practice
- 14. The amount of time the body takes to remove or inactivate one-half the initial amount of a drug.
- 16. Acronym for accelerated clotting studies
- 17. Whitish, threadlike, stringy material
- 18. Abbr. major plasma protein
- 20. Regulation that disallows the performance of clotting
- time studies in many facilities 21. Liquid vegetable fat that is a good source of calories for
- dialysis patients
- 22. Blood rich in oxygen
- 25. Cubic centimeter
- 28. Blood low in oxygen
- 30. Decompose or dissolve a blood clot
- 31. Losing blood as a result of too much heparin
- 33. Heparin from the intestinal mucosa of hogs
- 34. Usual method of administration of drugs in dialysis
- 35. Registered Nurse
- 36. Abbr. of artificial kidney
- 37. Opposite of stop
- 39. Common anticoagulant used in lab test tubes
- 42. Abbr. leukocyte
- 43. An organ of vision
- 44. The stage where clotting is initiated
- 46. Abbr. for government agency that takes a good sum of your paycheck
- 48. The rupture of RBCs with liberation of Hgb
- 49. Opposite of off
- 50. Number of stages in the clotting process
- 53. Straw colored, non-cellular liquid portion of the blood, contains clotting factors
- 57. Organization that oversees the health of the world.
- 59. Symbol for calcium
- 62. To give a substance into the venous portion of the vascular system
- High viscosity blood; RBCs mass together in capillaries, blocking the vessels or moving slowly through them
 A type of bleeding that can cause blindness in patients
- with diabetes mellitus
- 69. Common name for an eyelid infection
- 71. Expresses strong emotion, such as surprise

Copyright © 2001 Joanne D Pittard MS, RN Anticoag_puz_all.pub Save Date: April 29, 2001

- 73. Abbr. The immunoassay of a radio-labeled substance
- 74. An anticoagulant that suppresses clotting of blood
- 75. Liquid in a solid state
- 76. Abbr. clotting times
- 77. To coagulate
- 80. What to do with dialysis if the blood circuit clots
- 81. The organ that removes most old RBCs
- 84. With no delay; at once
- 86. Waste product in blood
- Refers to Heparin therapy, the dose given at the beginning of the treatment; another term for prime
- 89. The liquid portion of blood minus the clotting factors
- 91. Term for reduced, tight, or minimal dose heparin therapy
- 93. Nursing degree
- 95. Abbr. technicians that do patient care
- Acronym used in charting for patient experiencing difficulty in breathing
- 97. From the Latin word for kidney
- 98. Acronym for United States Pharmaceutical
- 100. Abbr. one-tenth of a liter or 100 mL; metric units
- 103. Association for the Advancement of Medical Instrumentation: abbr.
- 106. A device on the machine that infuses heparin
- 109. An artificial kidney
- 113. Plural for an open container used for drinking
- 114. Enzyme released into blood with injury to organs
- 115. Change from frozen solid to a liquid by gradual warming.
- 116. Abbr. National Association for Nephrology Technicians
- 117. A blood test that indicates available iron for erythropoiesis
- 118. Separation of dissolved substances from colloidal particles
- by diffusion across a semipermeable membrane **DOWN**
- 1. Two words used to describe the tubing used to transport
- blood to and from the patient and the artificial kidney
- 2. Electrolyte solution used for dialysis
- 3. Soaked with a liquid
- 4. The presence of an organism, usually a bacteria or virus, in the body which causes some kind of obvious or subtle illness
- 5. An enzyme that converts fibrinogen into fibrin
- 7. Measures the acidity or alkalinity of a solution.
- The formation of a jelly-like substance from blood, if intravascular it may halt blood flow in that vessel
 Milliliter

1

- 10. Slang for fluid removal rate during dialysis
- 11. Metric unit of volume equal to 10 liters.

12. Number of coagulation factors

- 13. Food and Drug Administration
- 15. Complex liquid organ that circulates throughout the cardiovascular system carrying needed components to the tissues
- 19. Heparin extracted from the lung tissue of beef
- 23. An over the counter drug with an anticoagulant effect
- 24. The acronym for End stage renal disease
- 26. A localized mass of blood that is usually confined
- within tissue, the blood is usually clotted 27. An injury producing a hematoma or diffuse extrava-
- sation of blood without rupture of the skin 29. As the hemodialysis treatment progresses, the plate-
- lets become more adhesive or
- 32. Abbr. for gastrointestinal tract
- 38. To be indebted
- 40. Abbr. Diphtheria, Pertussis, Tetanus vaccine
- 41. Must be removed during priming to avoid clotting of the dialyzer
- 44. Plural of ovum

55.

72.

- 45. Refers to the loading dose of heparin before initiating dialysis, allowing the blood to circulate in the body for 3 – 5 minutes
- 47. Abbr. for blood pressure

in So. Cal. or greeting 56. Abbr. Automated teller machine

67. To cease living

79. Thrombocytes

90. Color of blood

94. Symbol for sodium

for dialysis patients.

99. Abbrev. millimeter

cern in dialysis

intensive care

nancy

for viral hepatitis.

82. A major plasma protein

83. Pigmented protein on RBC

87. Type of gas sterilant for dialyzers

95. A short, sharp explosive sound

specialized cell, such as a blood cell

92. A translucent mineral, often used as a gem

85. Symbol for element iron

69. Symbol for silicon

58. Abbr. simple blood test for anemia 60. Largest gland in the body

61. Most abundant mineral in the body

63. The sister of one's mother or father

48. Coagulation factor, activated by contact with glass or other foreign surface

Abbr. for dialysis health care management company

- 51. Abbr. for most common viral hepatitis today
- 52. Acronym for recombinant human erythropoietin
- Acronym for a test to determine the presence of bacterial endotoxins in water

64. An excellent source of animal protein in the diet

66 Units of measure for the Prothrombin results

ued prior to the termination of dialvsis

81. To Scatter seed over the ground for growing

65. Precautions that assume all patients are infectious and

apply to the handling of blood and body fluids

70. The number of minutes heparin is usually discontin-

78. Route of administration for Coumadin and aspirin

89. An unspecialized cell that gives rise to a specific

96. A white crystal, used as food seasoning. Restricted

101. Refers to a type of body weight to determine patient

nutritional status. Closely resembles BMI index.

102. Abbr. An antibiotic resistant bacteria of recent con-

103. Abbr. alanine aminotranferase, an enzyme to screen

104. Abbr. Specialized section of the hospital to provide

105. Abbr. Fluid that circulates through the spinal cord,

urea removed during a dialysis treatment

111. RBC antigen that is important to test for in preg-

112. Number of AV fistula needles placed per treatment

Web Site: http://www.hemodialysis-inc.com

107. Acronym for blood test that measures the fraction of

brain, and subarachnoid space

108. An animal kept for companionship

110. An affirmative or consenting reply

Acronym for Health Care Financing Administration
