Registered Nurses (RNs) by dint of their RN license require no other license/certification to be employed in a hemodialysis facility.

Students, either Patient Care Technicians (PCTs) or Licensed Vocational Nurses (LVNs) are required to have additional licenses/certification to be employed in a hemodialysis facility

PCTs are required to pass a state certified hemodialysis exam and then must apply to the state of California for Certified Hemodialysis Technician (CHT) credential.

LVNs are required to pass an outside course on Intravenous (IV) Therapy and then must apply to the state of California for Certified Hemodialysis Technician (CHT) credential.

d) Salary and Wage Information based on Article 16; Section 94928

(1) Hemodialysis facilities commonly employ direct healthcare personnel for twelve (12) hour days, three (3) days per seven (7) day work week. Thusly a full time employee who works thirty-six (36) hours per week is paid forty-two (42) at their regular base rate. That is because the last four (4) hours of each work shift is paid at òtime and one-halfö and is thusly six (6) hours (formula:8+6=14) for a total of fourteen (14) paid hours/12 hour shift). The weekly hours are then (formula:14*3=42) forty-two (42) paid hours). A year has fifty-two (52) weeks; multiplying the weekly hours paid by the number weeks per year is (formula:42*52=2184) two-thousand-eighty-four (2184) paid hours/year.
